Process Systems Consultation, Design and Manufacturing Services

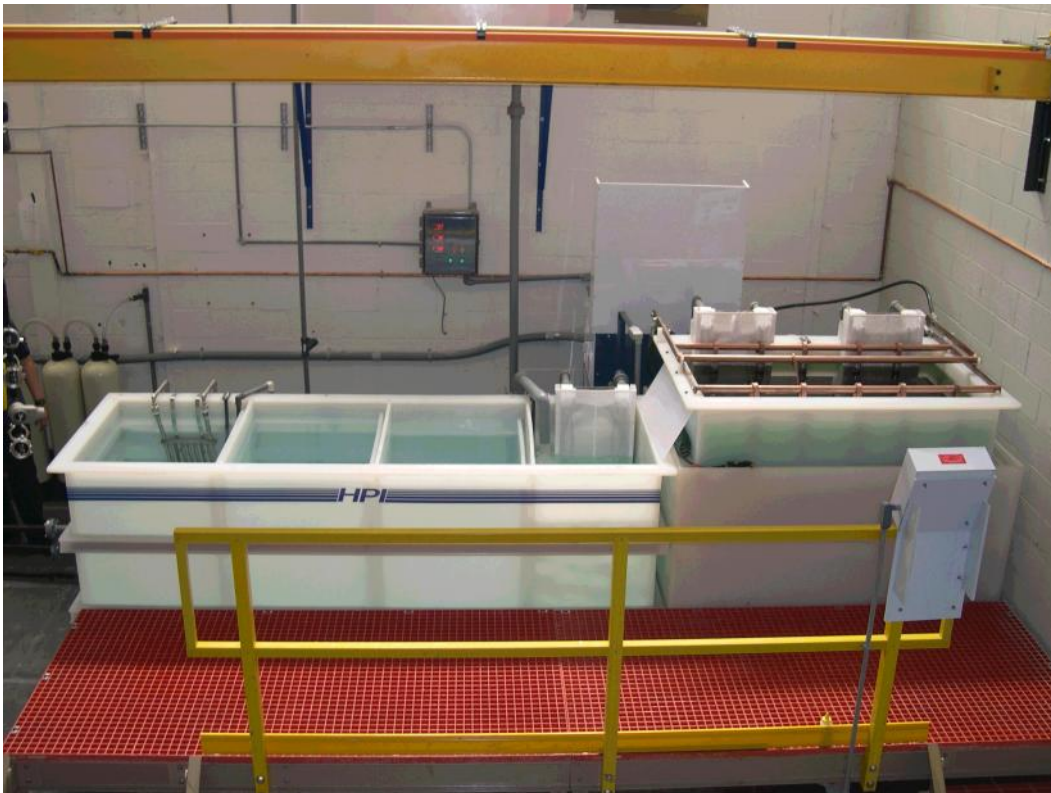

Over 30 years of wet processing systems application sales, engineering, manufacture and fabrication serving a variety of industries and additionally, a process chemical applications provider through our affiliates

Wet Processing Systems Application Design and Services

Provider of innovative solutions for a variety of processing equipment in the following applications:

- Electro-Polishing, Passivation and Metal Surface Finishing Process Systems
- Precious Metal and Copper Electrolytic/Electroless Plating Systems
- Photo-Etch/Micro-Machining Wet Processing Systems
- Semiconductor, MEMS and Nano-Technology Wet Processing Systems
- Compact Disc/DVD Wet Processing Systems
- Quartzware/Glassware Cleaning Systems
- Process Vessel Cleaners and Ultrasonic Cleaning Systems
- Machined Parts and Automotive Parts Cleaning Systems
- Chemical Metering and Pumping Stations
- Bulk Chemical Transfer/Distribution Systems.

Some examples of our complete services capabilities:

HPI Processes Revolutionary and Environmentally Friendly "UNIGLO 500" Electro-Polishing/Passivation Processing System Eliminates Chemical Replacement and No Waste Treatment Requirements.

HPI Processes offers the additional capability of installation and maintenance services, to provide a total *turn-key* solution to your equipment requirements.

Call us today for the solution to your fabrication requirements. 1-888-733-2832

Plastic Fabrication Services

Total plastic fabrication capability and expertise provided through our company, which enables our ability to offer reasonable precision fabrication pricing for the following applications:

- Capability of custom thermo-welded or extrusion-welded plastic tanks, consoles, cabinetry, platforms, double containment, chemical troughs, fume exhaust hoods, laboratory benches, work stations and wet processing modules/stations.
- Knowledgeable in all thermo-plastic materials, including FM 4910 rated, fire-retardant formulations, and FDA, USDA rated materials.
- Capable of CNC plastic sheet router of custom parts.
- Capable of modifications to standard molded plastic tanks in various materials and sizes.
- Capable of plastic plumbing fabrication utilizing threaded, solvent welded, thermo-welded flanged and socket, butt, Infra red, BCF and electro fusion-welded piping and fittings in various materials.
- Capable of plastic exhaust ductwork fabrication in both round diameter and rectangular ductwork configurations in various materials.
- Provider for both rigid and flexible plastic tank liners.

All Thermo-Welded, Polypropylene Fabricated, Steel Girth Reinforced, Double-Containment Plating Tank.

All CNC Router Cut, Thermo-Welded, Polypropylene Fabricated Wet Process Cabinet.

Stainless Steel Fabrication Services

Through partnership with another affiliated company, we offer competitively priced stainless steel and steel fabrication capability, for a variety of application requirements, similar to our plastic fabrication capabilities.

Call us today for the solution to your fabrication requirements. 1-888-733-2832
