TESTS:

- Performance
- Toxicological Risk Assessment

EXECUTIVE SUMMARY:

The product's odor removal properties were evaluated by subjecting the odor absorber containers to various conditions where strong, persistent odors permanently exist or were temporarily created.

The odor absorber containers were placed in close proximity to the following sources, which emit strong odors:

- In the car of a smoker, approximately 1 inch from the ashtray
- A towel with mildew growth
- In a kitchen where fish had just been cooked
- In the vicinity of a freshly painted surface

In each instance, the product was successful in removing all perceivable odors from immediate and surrounding areas from where the odors emanated.

The product is not classified as being toxic or a skin/eye irritant as defined in the 16 CFR 1500.3 (b)(5) and (8) (FHSA regulations), based on a Toxicological Risk Assessment (TRA) of the submitted product formulation by a certified toxicologist.

Note: The evaluation dated June 13, 2002 was subcontracted to an approved MTL-ACTS Toxicologist.
