

CUSTOM TANK BUILDER

HPI Processes Inc has been providing custom built tanks that have the capability for holding various types of liquids at specific temperatures.

HPI Processes Inc works closely with our customers to understand their application or industry requirements before building the custom tank that meets those requirements.

HPI Processes can build a custom tank in any dimension, storage capacity, area of usage, types of solutions to be stored, tank supports, tank top, materials, and more.

We can provide tanks with the following options—

- Liquid Level Monitors
- Liquid Level Controls
- Chemical Metering
- Pumps and Piping
- PLC controls
- Over flow weir sections
- Removable covers
